The greatly advantageous feature of the Brooklyn in endosing the Sur-ender Values upon its Policies, in Dollars and Cents, for len consecutive years, has met with unqualified praise from the most celebrated American Actuaries, as also from the Press. East. North and South.

The Hon. Elizur Wright, who is admitted to be the greatest Insurance Mathematician and Actuary in America, congratulating The Brooklyn Mathematician and Actuary in America, congratuating the Brooklyki upon this new and distinctive feature, says, among other things, "I am particularly pleased by your departure in the right direction from the ordinary method of computing the Surrender, Values." "One of the greatest drawbacks to the popularity of Life Insurance, has been the disappointment and disatisfaction of retiring Policy holders, at the smallness the surrender value paid," &c. "All this would have been prevented by a distinct statement on the Policy, in advance, of the sum to be paid."

This statement, it will be seen, The Brooklyn makes in dollars and cents, so that there can be no mistake.
